BUILDINGS & PLATFORMS

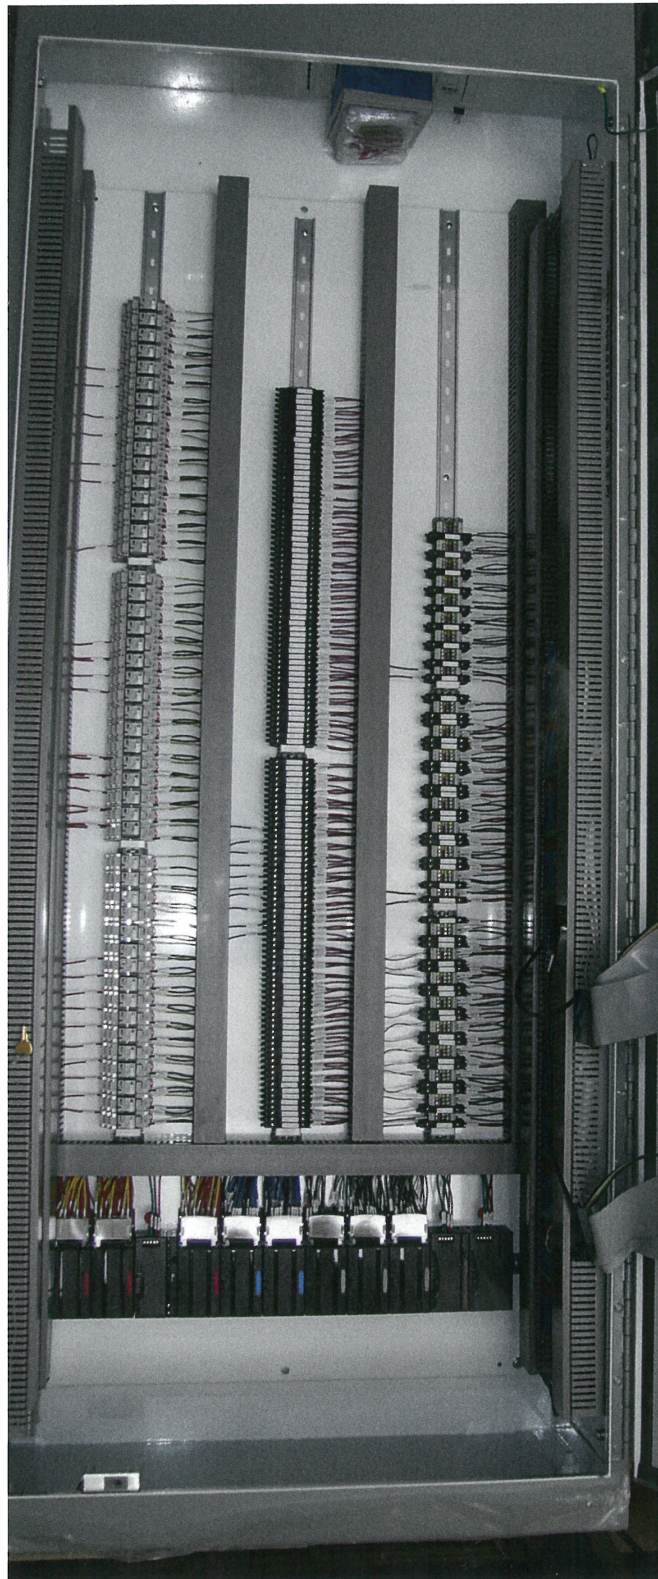

ESD&C has the capability to fabricate small simple driver buildings, to large complex control buildings in-house to save you money. We will deliver the building of your choice on-site ready for field connection.

ESD&C is your "one-stop shop" fabricator for platforms and stairs. From small tank or pipeline valve access platforms to multi-sectional manifold platforms, we fabricate, galvanize and ship on-site your custom platform and stairs guaranteed to meet your project demands.

PANELS & RACKS

Our panel shop turns out the highest quality control panels available. Troubleshooting problems in the field can be costly, so we review all fabrication drawings to identify potential problems before the panel is assembled. Large or small, we can build the panels you need and deliver when you need them. We can also fabricate racks to incorporate the control panels into an assembly for various uses and pre-wire the assembly back to the control panel which eliminates costly field work.
